DETAILED ACTION

Status of Application: Claims and Amendments

Prosecution of the instant application is resumed.

New Rejection:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 7-9 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent Publication 2005/0158827.

The polypeptide of the instant SEQ ID NO: 2 is 100% identical to the polypeptide disclosed by US Patent Publication 2005/0158827 as SEQ ID NO: 5, which is encoded by a polynucleotide (SEQ ID NO: 4) that has an identical coding region with the instant SEQ ID NO: 1 and what appear to be minor differences in the 5'-noncoding regions, see attached sequence alignment. Further, vectors, host cells, and methods of expressing the polypeptide of SEQ ID NO: 5 are discussed at length on pages 15-18 of US Patent Publication 2005/0158827. The polypeptide of SEQ ID NO: 5 and the encoding polynucleotide of SEQ ID NO: 4 of US Patent Publication 2005/0158827 appear to be fully supported by prior application **09/258633** filed 2/26/1999.
